

SOUND ANCHOR ADJ1- ADJ2

THREE SETUP OPTIONS

When we designed the Sound Anchor ADJ1 and ADJ2 stands we had to consider that there are many makes of monitors in studios. We also knew that each studio had its own acoustical characteristics. Knowing these two things we knew that no single stand or setup would give optimal performance in all studios.

The ADJ1 and ADJ2 stands are ideally suited for use with any small or mid sized studio monitors. Besides covering a wide speaker size range the ADJ1 and ADJ2 stands feature three set-up options:

1. POST BEHIND allows the speaker to be placed for maximum overhang. No tilt.
2. POST ASIDE allows the speaker to be tilted up or down.
3. PLATFORM ROTATED allows horizontal speaker layout .No tilt.

All three setup options allow height adjustment.
