

Bettermaker PEQ_core – Product Data Sheet

Overview

The **Bettermaker PEQ_core** brings the legendary, mastering-grade sound of the acclaimed Bettermaker Stereo Passive Equalizer (SPE) into a streamlined, space-saving **1U chassis**. Designed for modern, DAW-centric workflows, the PEQ_core removes physical front-panel controls in favor of total recall and precise manipulation via a dedicated plugin. It delivers the same 100% analog signal path and musicality as the flagship SPE, now at a much more accessible price point.

Key Features

- **100% Analog Signal Path:** Exceptional sound quality with the classic passive EQ character.
- **Ultra-Compact 1U Design:** Perfect for high-density studio racks.
- **Total DAW Integration:** Full control via VST3/AU/AAX plugin. Save and recall all settings instantly.
- **Mastering Quality:** Identical circuitry to the original SPE, including the famous "Air bands" (20 kHz and 28 kHz).
- **Cost-Effective:** Professional analog mastering tools without the premium cost of physical control surfaces.

Technical Specifications

Feature	Specification
Form Factor	1U Rack Mount
Signal Path	100% Analog
Control	Digital (via DAW Plugin)
Compatibility	VST3, AU, AAX

Feature	Specification

EQ Sections	Classic Passive Design (Low/High)

Why PEQ_core?

The PEQ_core is built for the producer or mastering engineer who prioritizes sound quality and workflow efficiency. By shifting the interface entirely to your DAW, we have eliminated the cost of physical knobs and displays, allowing you to invest in the pure, high-end analog sound that Bettermaker is famous for.
